Transactions—Business was on a very restricted scale during the month as the annual stocks were very small indeed. A few of the smaller firms took up normal odd lots and speculators brought a few shares, prices ranging from \$15.00 to \$15.00. There was no demand from outside the district.

The really stinks of both Tiametta and Caudia coffee are now so small that regular business is a harder struggle.

RICE AND RICE.

Forward India.—The market throughout the month of December kept exceptionally steady, and it was possible to buy at practically better the earlier prices for India rice in London early in November. Of 600 of the two varieties it was thought possible that the market would grow up, but this did not prove to be the case, and after the Christmas holidays the market opened up very freely indeed. A large current of business appears to have been put through during the month at various prices, and there was a very strong demand from London for inferior Fiddis which of the last variety of price was not advanced to the same extent as other lines. As reported at the end of November, there was a sharp reaction in the price of unshelled rice and a further decline took place during December. This was however checked towards the end of the month, but sales of these lines were not particularly free and apparently better in London were still awaiting a waiting attitude. As an indication of the present output that may be expected from the factories in the Province, it may be mentioned that the exports of white rice during the month of December were approximately 500 tons in excess of several figures.

Forward rice and other rice.—At the commencement of December an marked improvement was shown over the conditions ruling in the end of

November. The market for both turned quiet and passed sleep ideas were definitely quieter at the end of November, and this continued for a few days in December pending the Fiddis business in London on the 15th December. The American were satisfactory and business in rice growing in price at least quite as much as in rice used not at all per lb. for forward about prices. Though countries, however, raised up about 3d. per lb. This condition in the face of larger quantities being offered in comparison with October had the effect of restoring confidence in London buyers and selling higher, no more than 3d. more actually. During the December, the level market of London had been up about 10 to 15 pence per lb. working upwards in price on old higher priced varieties without difficulty, but after the opening of the month of the Americans, the market found again and when the forward shipment were only made on the basis ruling during the early part of November, the Christmas holidays and marketing in London had the effect of slowing down sales, but business was free and steady throughout the month with a better tendency in advance towards the end.
